Donate the difference

A cause worth championing

We are a country which prides itself on having quality education accessible to everyone. Yet many children in our own backyard miss out on gaining the educational foundations they need as a result of 'not qualifying' for, or having access to, the appropriate learning support services which they need in their very early years. Those most at risk are children who face a different journey as a result of developmental delays and disability.

At the Champion Centre, our belief is that every child, regardless of physical, mental, or social capacity, has the right to be educated, to learn and grow, and to reach their individual potential. Our purpose is clear, we want to remove barriers and unleash the potential of these children in our community whose journey is unplanned and often severely challenging.

But we can't champion these children alone. We need your help.

You can make a
difference today,
that will shape his
future tomorrow.

Help us, help children like Dekken by donating the difference

The Champion Centre is a not for profit organisation, that provides centre based early intervention services to children with complex developmental delays and disabilities between the ages of 0 and 6 years.

Each week we work with over 105 children, under the age of 6, as part of our full intensive programme. These children have a range of complex developmental conditions such as cerebral palsy, Down syndrome, autism and dyspraxia.

With ever-increasing operating costs above \$2 million per annum, the delivery of our services are largely sustained through community funding.

The approximate cost associated with delivering our full intensive programme equates to, on average, \$18,000 per child annually.

As Government funding covers less than 60% of our services, we are challenged with raising over \$7,000, for each child, every year.

By participating in 'Donate the Difference' your gift of \$7,000 will help remove funding barriers, ensuring that a child with severe development delays and disability has access to internationally recognised services, which will enable them to reach their fullest potential, now, and into the future.
